Pro-Line Trimming System

Flex drive for
trimming blade

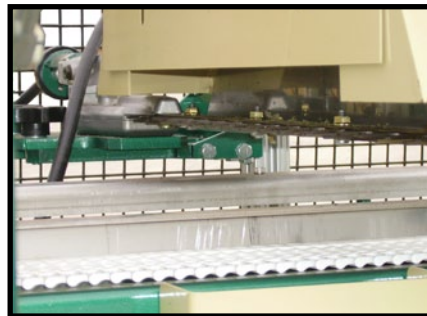

Crank handle adjustment

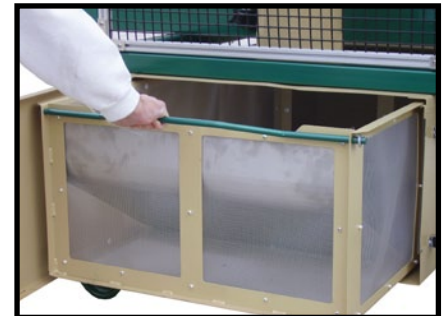

**A proud member of the
BouldinCorp™ Family**

The new Pro-Line Trimming System automates uniformed trimming of trays, flats, and pots. A variable speed conveyor carries materials through a specialty trimming blade. The blade can be adjusted from 18" high down to any desired height.

A custom vacuum system is utilized to gather and store loose clippings in a 10 cubic foot storage container. This system also provides updraft air to clear trimmings.
